

Adverse Weather Conditions Guidelines

If it's **snowing**, your solid waste and recycling may not be picked up on the scheduled day. Many of the Township sanitation and recycling trucks are set up to perform plowing operations during significant snow storms. Either put your containers out at curbside on the next collection day or you may bring them to the Recycling Center. If you have any questions, please call the sanitation office at (973)263-7273.

If it's a **windy** day, put lids or heavier material on top of the containers to prevent lighter materials from blowing away.

If it's **raining** cover the containers with a lid. Also, put drain holes in the bottom of the container.

If your solid waste and recyclables are collected on the same day, it is imperative that all your containers are labeled properly to avoid confusion. Decals for recycling and yard waste are available at the Public Works Department at no cost.

Always remember different trucks pick up different items.
